Connect Four

Connor Settle, Ricky Grannis-Vu, and Danielle Tang

Jim Clune, GGP-2005

GENERAL GAME PLAYING

Design AI to play
arbitrary games
successfully based on
rules given at runtime

```
342 legal(P,mark(X,Y,M,N)) :- true(turn(P),d1) & true(cell(X,Y,M,N,blank),d1) & valid_board(X,Y)
343 valid_board(X,Y) :- true(board(X,Y),d1) | true(board(any,any),d1)
344 filled_board(X,Y) :- ~true(cell(X,Y,1,1,blank),d1) & ~true(cell(X,Y,1,2,blank),d1) & ~true(cell(X,Y,1,3,blank),d1) & ~true(cell(X,Y,2,1,blank),d1) &
~true(cell(X,Y,2,2,blank),d1) & ~true(cell(X,Y,2,3,blank),d1) & ~true(cell(X,Y,3,1,blank),d1) & ~true(cell(X,Y,3,2,blank),d1) & ~true(cell(X,Y,3,3,blank),d1)
345
346 click(mark(X,Y,M,N)) & true(turn(P),d1) ==> true(cell(X,Y,M,N,P),d1) & ~true(cell(X,Y,M,N,blank),d1)
347 click(mark(X,Y,M,N)) & true(turn(P),d1) & true(board(any,any),d1) ==> ~true(board(any,any),d1) & true(board(M,N),d1)
348 click(mark(X,Y,M,N)) & true(turn(x),d1) ==> ~true(turn(x),d1) & true(turn(o),d1)
349 cli
350
351 cli

```

GAME DESCRIPTION LANGUAGE

Formal language using symbolic logic to encode the state and rules of a game

WITH GDL,
WE CAN USE LOGIC
PROGRAMMING TO IMPLEMENT
GAME PLAYERS

OUR TASK

Connect Flour

The Original Vertical Four-In-A-Row
Checkers Game

CRACKED.com

MB
MINDY
BROTHERS

no, not that one

CONNECT FOUR

use dynamic logic programming to build a Connect Four worksheet

-
- automated greedy AI opponent
 - your next move, scored
 - environment helps you play

Connect 4

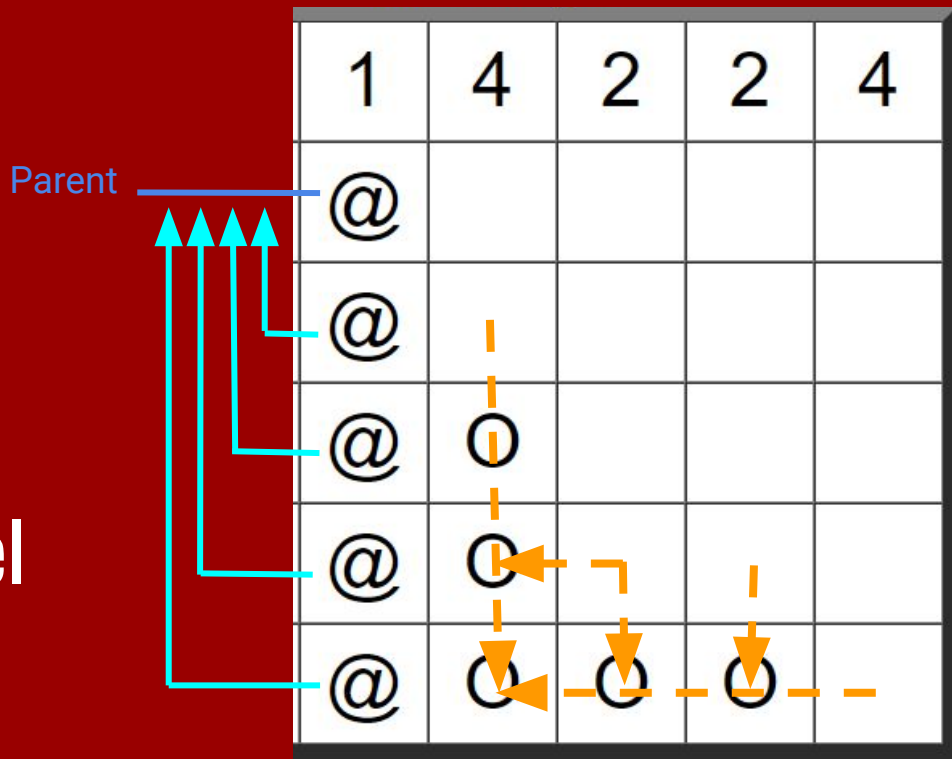

Click in a clear square
to mark that square.

2	2	1	2	2	4
○	○	@			
@	@	@			
@	@	○			
○	@	○	○	○	

Player: ○

OUR APPROACH

- recursive inheritance model
- “raycast” properties
- calculate next goal values

RESULT

- fast, responsive game
- behaves like actual connect-4
- AI player tries to win as fast as possible, but with no regard to human player

CHALLENGES

- calculating next game state
- diagonal raycasting
- optimization
- locking behaviors during real-time simulation

2	2	2	@
		@	@
	○	○	@

HERE'S HOW TO PLAY

- Operation
- Query
- Trace
- Transform
- Transition**
- Check Errors

- Clone Widget(s)
- Edit Widget
- Group Widgets
- Ungroup Widget(s)
- Remove Widget(s)
- Toggle Group Outlines

- Undo
- Redo

Clear Board

Connect 4

Click in a clear square to mark that square.

Player: O

operation -> transition

enter the following values

Transition ✕

Action: act
Interval: 10

Run Pause Step

CLICK RUN

ENTER THE WORLD OF CONNECT-4!

Connect 4

Click in a clear square
to mark that square.

1	1	1	1	1	1	1

Player: O
